OBJECTIVE

I'm a fourth-year undergraduate student majoring in Computer and Systems Engineering. I'm currently exploring exciting career prospects or engaging technical internships in the fields of data science, web development, and IT. My goal is to utilize my previous encounters, academic background, and skills in leadership, teaching, and communication to make a meaningful contribution.

EDUCATION

Faculty of Engineering Zagazig University

2020 – present . GPA: 3.3

Bachelor's Degree in Computer and Systems Engineering

Professional Experience

Orange Business , Egypt

Mar. 2024 -July. 2024

Software engineer intern

The Internship Objectives include delving into the following areas:

- HTML, CSS, JavaScript, Python, and React
- Django ,django rest and FastApi
- Developing back-end projects using Python, Django, and REST APIs.
- SQL/MYSQL for database

ITI, Ismailia(Blended), Egypt

Aug. 2023 - Oct.2023

Frontend web developer

During this training period, the focus will be on mastering the following skills and technologies in Frontend Web Development:

- HTML and CSS, including CSS3 features
- JavaScript, with an emphasis on ES6
- HTML5 and jQuery
- SASS and Bootstrap frameworks
- Crafting responsive designs to ensure optimal user experiences.

NTI, Remotely

Aug. 2022 – Sep. 2022

Artificial Intelligence (AI) Trainee

It is separated into technical and non-technical

For technical part : Overview of artificial intelligence , Python programming basics , Essential mathematics knowledge and pre-knowledge for Deep Learning , Overview of Deep Learning , Overview of TensorFlow, programming basics,methods of using TensorFlow programming for image recognition, speech recognition, and human-machine dialogue , Overview of Huawei cloud EI

For non-technical part : General Skills, Teaching skills , Leadership Skills, and Freelancing Skills.

ALX, Remotely

Feb. 2023 – June. 2023

Software Engineer

- In the first sprint, we will delve into the following subjects: Git & Command line editors , intro to Bash , overview of Linux , c - programing Fundamentals , c - pointers , c-static library , c- memory allocation , c-Bit manipulation , File I/O , Singly Linked lists

CERTIFICATIONS

- Machinify: Data science and ML Diploma Oct. 2022
- Udacity – FWD: Data Analysis Professional Track Mar. 2022
- Udacity – FWD: Data Analysis challenger Track Dec. 2021
- Udacity – FWD: Web development Challenger Track Aug. 2021

Technical Skills

Programming	Ms SQL , C# , Python, Js, Java, OOP, JavaFX, C, VB6, Html & Css, MATLAB.
Operating Systems	Windows, Linux, Chrome OS.
Development tools	VScode, PyCharm, Google Colab, Jupyter notebook, vim.
Machine Learning Tools	TensorFlow,Keras, Sklearn, Visualization,Data Analysis and Preprocessing
Tools	Database , Python and Linux Bash Scripting, Version control using GIT.

Projects

Battle-Ship-Game

GitHub link

Java, JavaFX, OOP, CSS

- The goal is to create a Game With OOP .and design GUI with JavaFX

age-calculator-app

GitHub link

JavaScript , Html , CSS

- Building realistic projects.
- Making responsive design

Printf

GitHub link

C

- Implement Printf Function with C .

Customer-Churn

GitHub link

Python , pandas ,Seaborn

- It is to ask some questions related to the dataset then answer it using Pandas, NumPy, through the data analysis process: wrangling, cleaning, plotting, exploring Data Analysis, (EDA) and making predictions.

Extracurricular Activity

- **GDSC AI_Azher Student Branch**
instructor Oct. 2022 – Oct .2023
In the role of a Machine Learning instructor, I guided students to grasp intricate algorithms and their applications. Through interactive teaching methods, I aimed to empower them with practical skills to navigate real-world data challenges and succeed in the field of artificial intelligence.
- **Zigzag Club**
Head Of CS track and instructor Oct. 2021 – Present
- **Nasa Space Apps Cairo**
Participant Oct. 2022
My goal was to tackle the challenge of protecting the Earth from the Carrington event by utilizing AI to predict its occurrence
- **Life Maker Faques** 2017–2019
- **Nasa Space Apps Ismailia**
Participant Oct. 2023
We got first place in the competition
Nasa space apps global nominee
